About Me

My name is Graham Vickers and I am a Full Stack Developer with 4+ years of experience with a diverse skillset of programming languages, along with brand development, business management and client relations. Let's connect and work together to create a better tomorrow for everyone.

My Education

Interactive Media Specialist Fanshawe College, 2021-2022

Graduated on the Dean's Honor List (4.0 GPA +) This program expanded my knowledge of designing and developing modern web applications, utilizing adobe suite with the LEVN and MEVN stacks. I created notable projects such as Bizz Net - A business marketplace where businesses can list, buy or sell a company. Investors can browse current listings utilizing my custom API and acquire businesses through app features. Aswell as MetaWorld - A live cryptocurrency market monitoring app that uses the MEVN stack and the CoinGecko API to display live data to the user.

Qualifications

- Write clean/ consistent HTML, CSS, JS, & PHP
- Experience in back-end and front-end development
- Passion to learn new technologies
- Energy, commitment and motivation
- Proficient in Adobe Suite
- Experience with SQL & NoSQL
- Strong organization and rigor

Business Essentials

Fanshawe College, 2020-2021

The Business Essentials program gave me the tools to start and manage a small business's finances and track its performance. Learning the proper process of accurate accounting and business management led to me starting a landscaping business that summer and netting over \$200,000 in revenue in 5 months. The success of this venture was largely due to my past knowledge and experience in landscape construction, brand design, website design and development.

Graham Vickers

Full Stack Developer

Creating lasting impressions is what I do.

Knowledgeable

- MEVN & LEVN stacks
- HTML 5
- Sass/Scss
- CSS 3
- Javascript ES6
- Vue.js
- MongoDB
- Laravel
- Node.js
- Express
- Github/ Git
- PhpMyAdmin
- MySQL
- Docker
- Php
- Gulp
- Adobe Suite

My Education

Interactive Media Design Fanshawe College, 2018-2020

During the program, I gained the knowledge and necessary skills to be a full-stack web developer in this ever-changing industry. Working with modern web frameworks I created notable projects, the first being a prototype Sportschek eCommerce store where users can browse, add to a cart, and go through the mockup checkout process. Another project is Coder Chat, a live chat forum website where coders who need support, help, or just looking to chat can use the services powered by Socket.io and Vue.js.

Work Experience

Owner - Director of Operations, Royal Hunt Landscape & Exteriors, Mar 2021 - Sep 2021

As a summer project during the pandemic, I wanted to take a risk and start my own company with the knowledge and experience I have gained over the years. Combining all of my skills enabled me to manage a crew of 4 labourers and generate over \$200,000 in net revenue over 5 months.

Landscape Contractor, Jay McKinnon Company, May 2019/20 - Sep 2019/20 (Seasonal)

During my time with the company, I assisted with the training and coaching of new hires, and further developed my organizational and teamwork skills. As well I led the operation of heavy equipment machines to maximize efficiency to increase profits and revenue.
